

Unique in Europe, Caducy is a solution allowing a digital clinical examination to be performed, it can be integrated onto teleconsultation platforms.

PRESS RELEASE

Measurement of 4 physiological variables

Ease of use

Non invasive (contactless)

Accessible anywhere with a camera

Heart rate (HR)

Heart rate variability (HRV)

Respiratory rate (RR)

Stress level

Medical guarantee

Robust

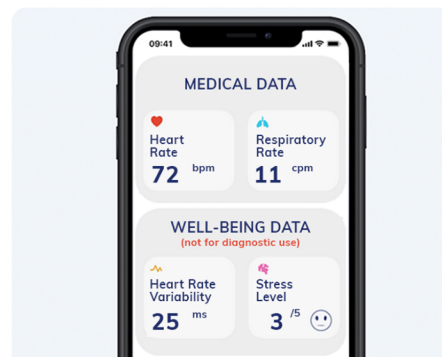

Caducy emerges as a **revolutionary solution** for the e-health industry as it allows, in a world upset by a major health crisis, **to comply with social distancing**. As a pioneer in « contactless solutions », i-Virtual aims to provide **the world of telemedicine** with the technological bricks that are missing from its full integration into new lifestyles. In consultation, Caducy allows to **limit the expenses related to the hygienic measures** and the replacement of the accessories after each use.

Just sit back and relax
